

DEMOGRAPHICS OF TÜRKİYE

SUZAN NİSA ÇEVİK

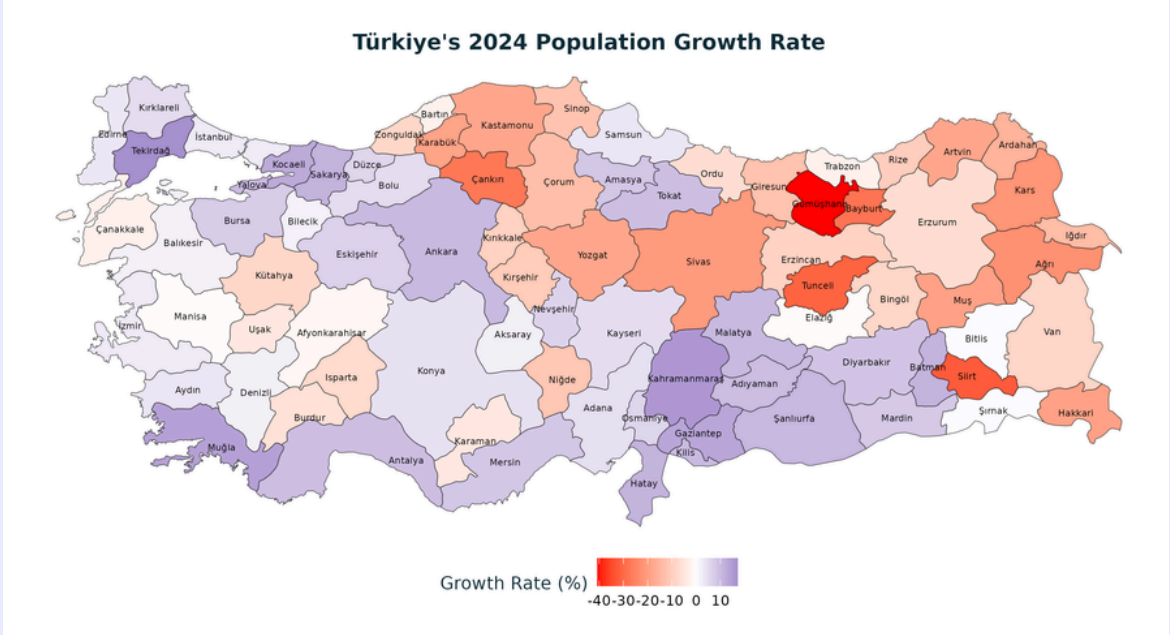

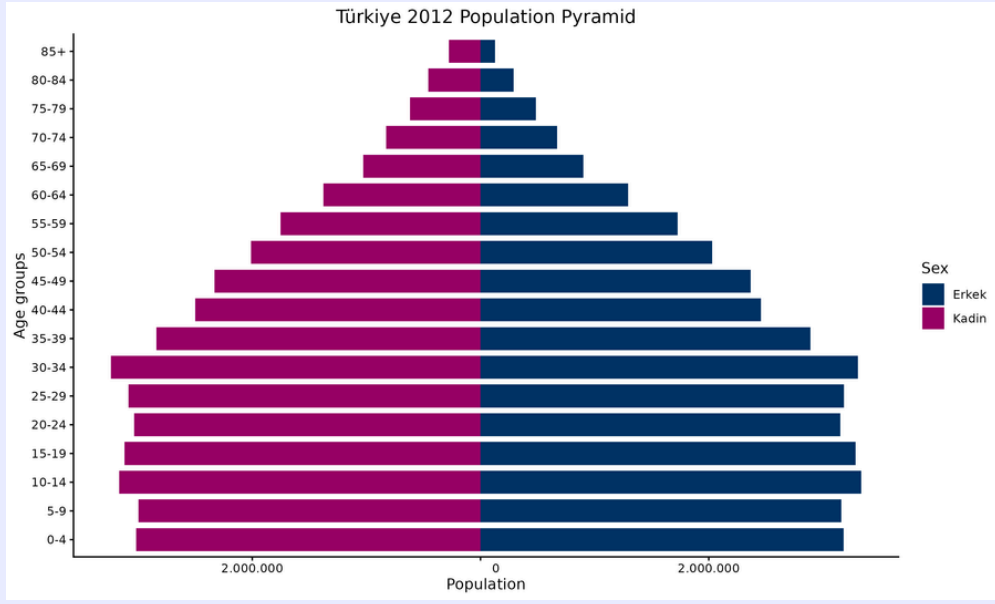

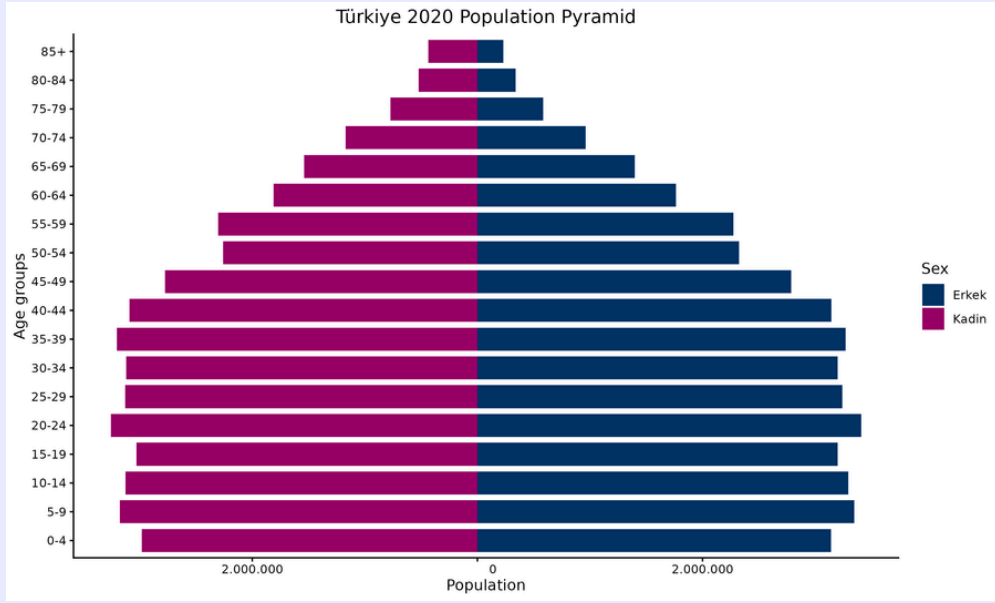

TÜRKİYE IS TRANSITIONING FROM A COUNTRY WITH A "YOUNG POPULATION" TO ONE WITH A "MATURE AND AGİNG" POPULATION STRUCTURE.

THE BOTTOM PORTIONS OF THE PYRAMİDS (0-4 AND 5-9 AGE GROUPS) ARE NARROWING OVER THE YEARS. THIS İNDİCATES A SİGNİFİCANT DECREASE İN BİRTH RATES İN TÜRKİYE.

THE UPPER ECHELONS OF THE PYRAMİD (THE ELDERLY POPULATION) ARE EXPANDING OVER TIME. AS AVERAGE LIFE EXPECTANCY İNCREASES, THE PROPORTION OF THE ELDERLY POPULATION İS RİSİNG.

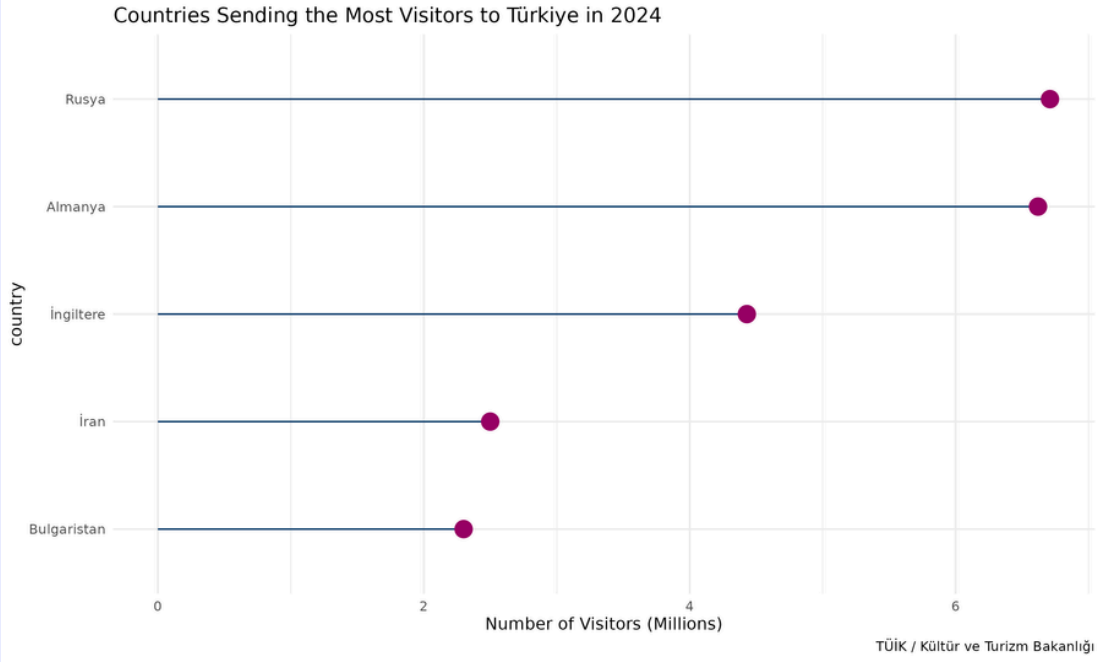

THE PYRAMİD STRUCTURE İS EVOLVİNG FROM A "YOUNG AND DYNAMİC" TRIANGULAR FORM TO A "BARREL" FORM DOMİNATED BY MİDDLE AGE. THIS İS EVIDENCE THAT TÜRKİYE'S POPULATION İS RAPİDLY ENTERİNG AN AGİNG PROCESS.

THE POPULATION GROWTH RATE İS NEGATIVE İN THE İNLAND AREAS OF THE BLACK SEA REGION (SUCH AS GÜMÜŞHANE, BAYBURT, AND ÇANKIRI) AND SOME PROVINCES OF EASTERN ANATOLİA (AROUND TUNCELİ AND SİİRT). THESE PROVINCES ARE EXPERİENCİNG SİGNİFİCANT OUTWARD MİGRATİON.

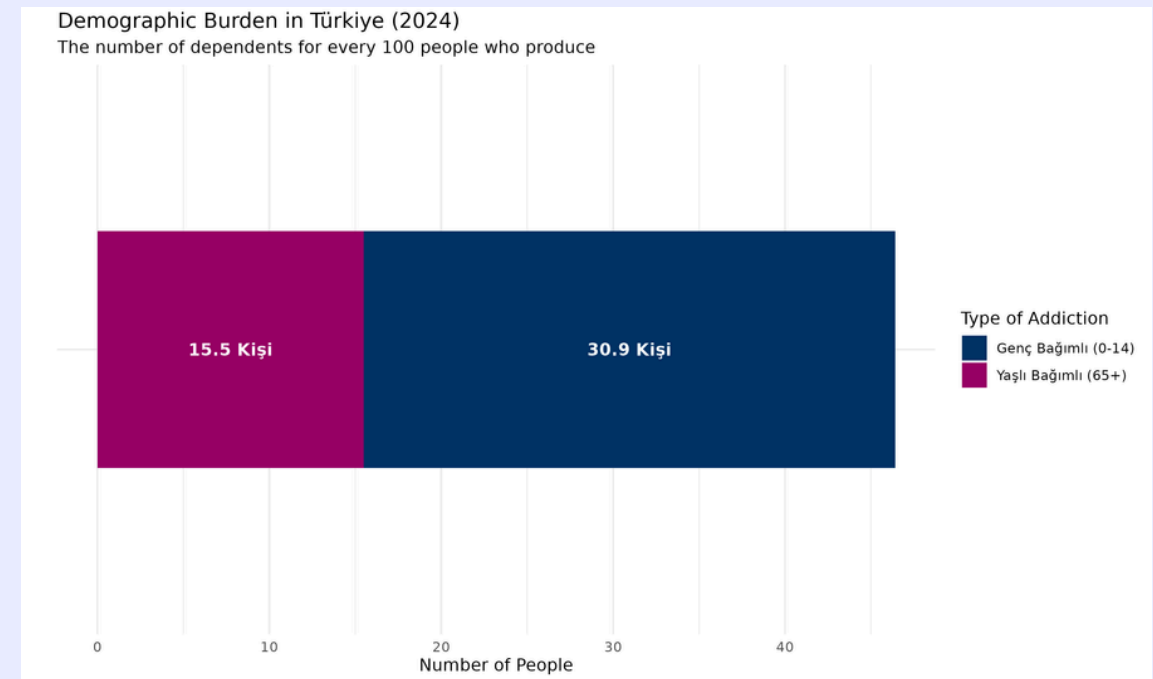

POPULATION GROWTH RATES ARE POSİTİVE İN WESTERN ANATOLİA (TEKİRDAĞ, THE AREA AROUND İSTANBUL, MUĞLA), SOUTHERN ANATOLİA (THE AREA AROUND ANTALYA), AND PARTS OF SOUTHEASTERN ANATOLİA. THIS İNDİCATES THAT İNDUSTRIALİZED PROVINCES AND TOURİSM REGİONS CONTİNUİ TO RECEIVE MİGRATİON.

WHİLE WESTERN AND COASTAL REGİONS OF TÜRKİYE CONTİNUİ TO ATTRACT POPULATION, İT İS NOTEWORTHY THAT MANY PROVINCES İN THE İNTERİOR AND EASTERN REGİONS ARE EXPERİENCİNG POPULATION DECLİNE.

RUSSİA AND GERMANY ARE THE MAİN SOURCES OF TOURİSM TO TÜRKİYE, WITH OVER 6 MİLLİON VİSİTORS EACH.

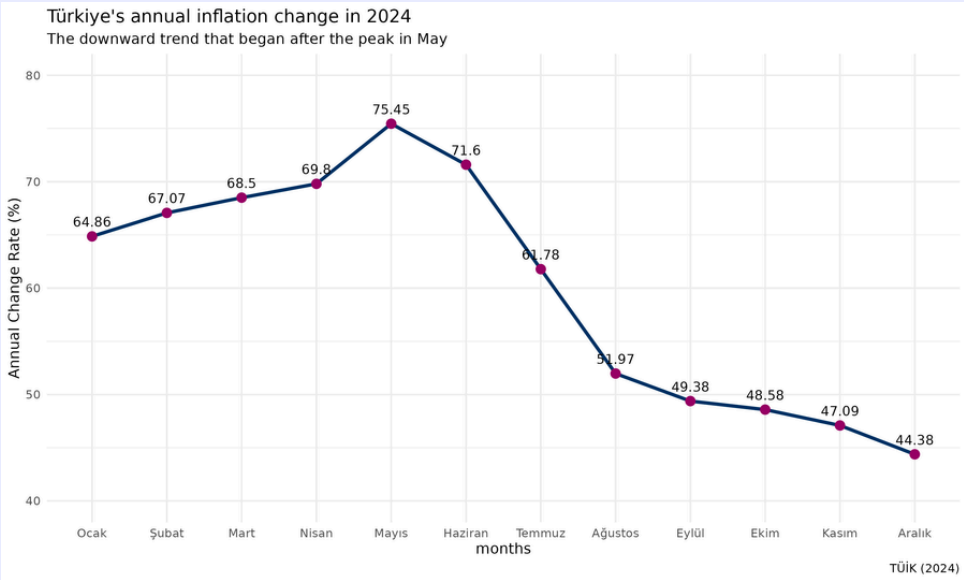

THE UK RANKS THİRD WITH APPROXİMATELY 4.5 MİLLİON VİSİTORS, FOLLOWED BY İRAN AND BULGARIİ (EACH İN THE 2-3 MİLLİON RANGE).

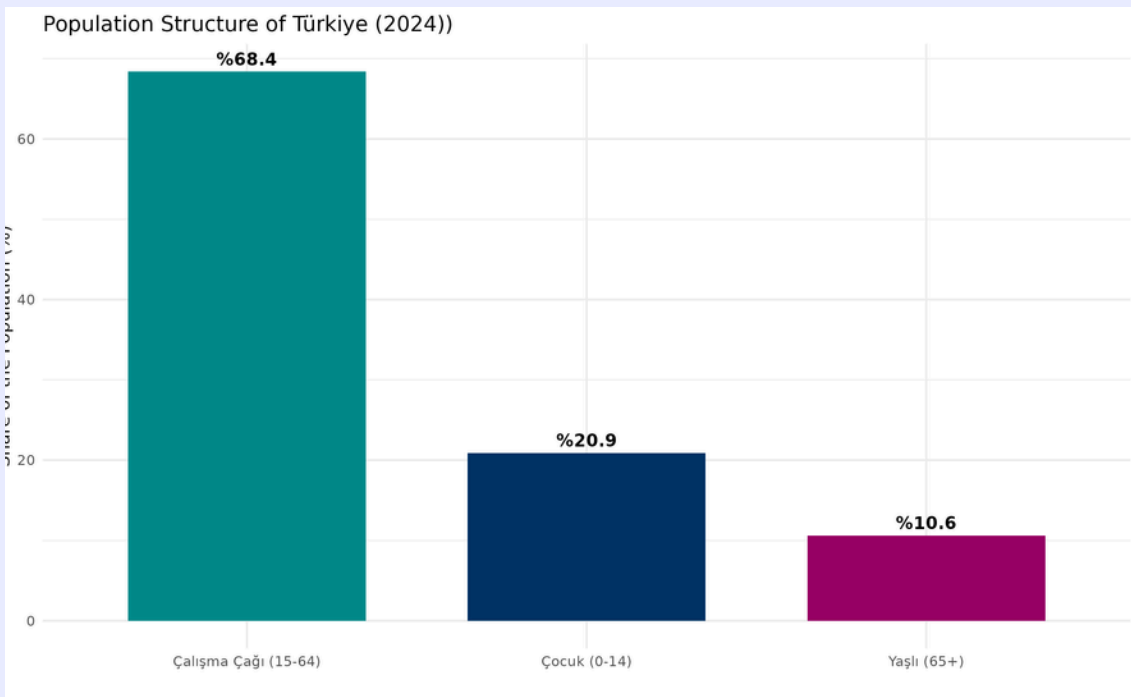

ACCORDİNG TO THE GRAPH, İN TÜRKİYE, THERE ARE A TOTAL OF 46.4 DEPENDENTS PER 100 WORKİNG PEOPLE (30.9 YOUNG PEOPLE + 15.5 ELDERLY PEOPLE). THIS İNDİCATES THAT THE ECONOMIC BURDEN ON THE WORKİNG-AGE POPULATION İS APPROXİMATELY HALF.

İN TÜRKİYE, THE BURDEN OF "YOUTH DEPENDENCY" İS SİLL MUCH HİGHİER THAN THAT OF THE ELDERLY. THIS DEMONSTRATES THE CONTİNUİNG NEED FOR SERVİCES SUCH AS EDUCATİON, CHİLD HEALTH, AND CHİLDCARE.

THIS FİGURE HAS BEEN ON AN UPWARD TREND COMPARED TO PREVIOUS YEARS. AS THE POPULATION AGES, THE BURDEN OF "RETİREMENT CARE AND HEALTH EXPENSES" ON EACH WORKİNG İNDİVİDUAL İNCREASES.

ANNUAL İNFLATİON, WHİCH STARTED AT 64.86% İN JANUARY, GRADUALLY İNCREASED AND PEAKED AT 75.45% İN MAY. STARTİNG İN MAY, THE CHART TOOK A SHARP DOWNWARD TURN. THE DOWNWARD TREND THAT BEGAN İN JUNE CONTİNUED UNTİL THE END OF THE YEAR. THE RATE OF DECLİNE ACCELERATED PARTİCULARLY İN JULY AND AUGUST. THE İNFLATİON RATE FELL TO İTS LOWEST LEVEL OF THE YEAR İN DECEMBER, REACHİNG 44.38%.

THE VAST MAJORITY OF THE POPULATION (68.4%) İS OF WORKİNG AGE. THIS SHOWS THAT TÜRKİYE SİLL HAS A STRONG WORKFORCE POTENTIAL. İN ECONOMIC LİTERATURE, THIS İS BEGİNNİNG THE "DEMOGRAPHİC OPPORTUNİTY WİNDOW"; THAT İS, THE NUMBER OF PEOPLE PRODUCİNG İS MUCH GREATER THAN THE NUMBER OF PEOPLE CONSUMİNG (CHİLDREN AND THE ELDERLY).

APPROXİMATELY ONE İN FİVE PEOPLE İS A CHİLD. THIS RATE HAS BEEN DECLİNİNG COMPARED TO PREVIOUS YEARS. THIS CONFİRMS THAT THE RATE OF POPULATION REPLACEMENT HAS SLOWED AND THAT TÜRKİYE HAS TRANSİTİONED FROM A "VERY YOUNG" POPULATION TO A "MATURE" ONE.

THE PROPORTİON OF THE ELDERLY POPULATION HAS EXCEEDİNG THE 10% THRESHOLD. A COUNTRY'S ELDERLY POPULATION EXCEEDİNG 10% İNDİCATES THAT İT İS BEGİNNİNG TO FALL İNTO THE CATEGORY OF "COUNTRIES WITH AN AGİNG POPULATION" DEMOGRAPHİCALLY. İT İS A SİGN OF İNCREASİNG NEED FOR HEALTHCARE SERVİCES AND PENSİON SYSTEMS.
